

8th International Congress of the European
Bioelectromagnetics Association (EBEA)
<http://www.ebea.org>

10-13 April 2007
Bordeaux, France

INVITATION – WELCOME TO Bordeaux!

The 8th Congress of European Bioelectromagnetics Association (EBEA) will be held in Bordeaux, France, 2007 April 10-13. Scientific activities in the area of bioelectromagnetics are growing worldwide and cover an even larger spectrum including intermediate fields, terahertz and UWB. These studies focus on two main aspects of the subject: therapeutic applications and potentially harmful effects of exposures to electromagnetic fields. The EBEA has held seven congresses since its foundation. The scope of the 8th EBEA Congress is to provide a forum for presentation and discussion of latest findings on biological effects of electromagnetic fields including dosimetry, interaction mechanisms, health effects, medical applications, risk perception and policies.

The meeting *per se* will start on Wednesday 11th. Tuesday 10th will be devoted to a course for students and can be used in parallel for meetings of associated or invited bodies.

TOPICS

EBEA 2007 will cover the following areas of EMF research:

- Dosimetry & Exposure systems
- Interaction mechanisms
- Human studies
- Epidemiological studies
- In vitro-studies
- In-vivo studies
- Implementation of worker's European Directive
- Risk perception and communication
- Medical applications
- New emerging technologies UWB, WiFi, WiMax, ...

Tutorial or special session will be devoted to the implementation of the directive and IARC-WHO classification of RF based on ICNIRP review in view of most recent epidemiological studies.

The course on Tuesday 10th April will cover the methodology and instrumentation for implementation of the EU directive on EMF for occupationally exposed persons.

DATE AND PLACE

10-13 April 2007

ENSCP - 16, Avenue Pey Berland - 33 607 Pessac Cedex (*near Bordeaux*)- France
