

Alessandro Chiabrera Award for Excellence in Bioelectromagnetics

The Council of the European Bioelectromagnetics Association
awards the 2015 Alessandro Chiabrera Award to

Dr Maxim Zhadobov

for his ability to perform excellent research in the field of innovative biomedical applications of electromagnetic fields and associated technologies. Beside his wide range of scientific interests, his outstanding contributions emerged in the topic of body centric wireless network with new antenna design and dosimetry.

The EBEA Council believes that his research will provide important contributions to the advancement of knowledge and technical applications of electromagnetic fields in health care.
