

Alessandro Chiabrera Award for Excellence in Bioelectromagnetics

The Council of the European Bioelectromagnetics Association
awards the 2018 Alessandro Chiabrera Award to

Dr Bor Kos

for his excellent research in the field of biomedical applications of electromagnetic fields and associated technologies. Among his wide range of scientific interests, his outstanding contributions emerged in the topic of electrochemotherapy, with numerical treatment planning.

The EBEA Council believes that his research will continue to provide important contributions to the advancement of knowledge and development of electroporation-based therapies.
