

Dear Colleague,

We are pleased to invite you to attend the *seventh edition* of International Summer School in “Advanced Topics in Cell Model Systems” to be held in Rome-Italy from **8th-12th June 2015** at the Tor Vergata Research Establishment of National Research Council of Italy.

One week of school for PhD students and young researchers, under 35 years, in the Eternal City Rome to facilitate an effective sharing and dissemination of new and innovative research ideas, strategies, focal points on cell model systems to promote pharmaceutical, pharmacogenomics, tissue engineering and computational research together with twelve outstanding scientists from different countries.

Twelve scientists of the Research Establishment of National Research Council (CNR) will impart practical exercises at laboratories on optical and electronic microscopy, Ultra- Vacuum, microsystems and microelectronics, techniques in model membrane systems and dynamic molecular simulations.

No other schools are present in Europe on this specific topic and mixing of theoretical and practical approaches.

We cordially invite you to participate in this exciting CMS3 summer school by applying and submitting your CV. The web page is at www.cms3.cnr.it . The working language of the school will be English. The registration fee is 150 €. Closing date for applications : **April 20th, 2015**.

I would appreciate it if you would also send this information to any colleagues of yours that may be interested.

We apologise if you receive this invitation more than once, we are, by necessity, using several data bases to send these invitations.

Thanks for your interest and hope to see you in Rome in June 2015.

On behalf of the Organizing Committee

Alfonsina Ramundo-Orlando
(Director of the School)
